

Product overview 2020/2021

Our range of products and services

Switching sensors

8

Photoel. sensors / diffuse sensors, cubic housing	10
Photoel. sensors / diffuse sensors, cylindrical housing	14
Long-range sensors	15
Inductive switches	16
Capacitive sensors	18
Fiber optic sensors / ultrasonic sensors	20
Light curtains	22
Forked sensors	23
Special sensors	24
Double sheet monitoring / splice detection	25

Measuring sensors

26

Distance sensors	28
Sensors for positioning	30
3D-sensors / forked sensors	31
Sensors for compartment fine positioning	32
Light curtains / volume measurement system	33

Products for safety at work

34

Safety laser scanners	36
Safety light curtains	38
Multiple light beam safety devices	42
Protective sensor sets and accessories	44
Single light beam safety devices	46
AS-i-safety product range	48
Safety switches and safety locking devices	50
Safety proximity sensors	52
Safety command devices	53

Safety relays	54
Programmable safety controls	58
Machine safety services	60

Identification	62
Stationary bar code readers	64
Stationary 2D-code readers	67
RFID systems	69
Mobile code readers	70

Data transmission	72
Optical data transmission	74

Network and connection technology	76
Connection technology	78
Modular connection units	80

Industrial image processing	82
Smart cameras	84

Accessories and supplementary products	86
Signaling devices	88
Mounting systems	89
Reflectors	90

Forerunner

Yesterday. Today. Tomorrow.

With curiosity and determination, we – the Sensor People – have been innovators for technological milestones in industrial automation for more than 50 years. The success of our customers is what drives us. Yesterday. Today. Tomorrow.

Our company

Everything at a glance

In a constantly changing industry, we work together with our customers to find the best solution for their sensor applications: innovatively, precisely and efficiently.

Key figures

Foundation	1963
Company structure	GmbH + Co. KG, wholly family-owned
Executive management	Ulrich Balbach
Headquarters	Owen, Germany
Distribution companies	20
Production locations	5
Technological competence centers	3
Distributors	40
Employees	> 1,200

Product range

- Switching sensors
- Measuring sensors
- Products for safety at work
- Identification
- Data transmission systems
- Network and connection technology
- Industrial image processing
- Accessories

Focus industries

- Intralogistics
- Packaging industry
- Machine tools
- Automotive industry
- Laboratory automation

Switching sensors

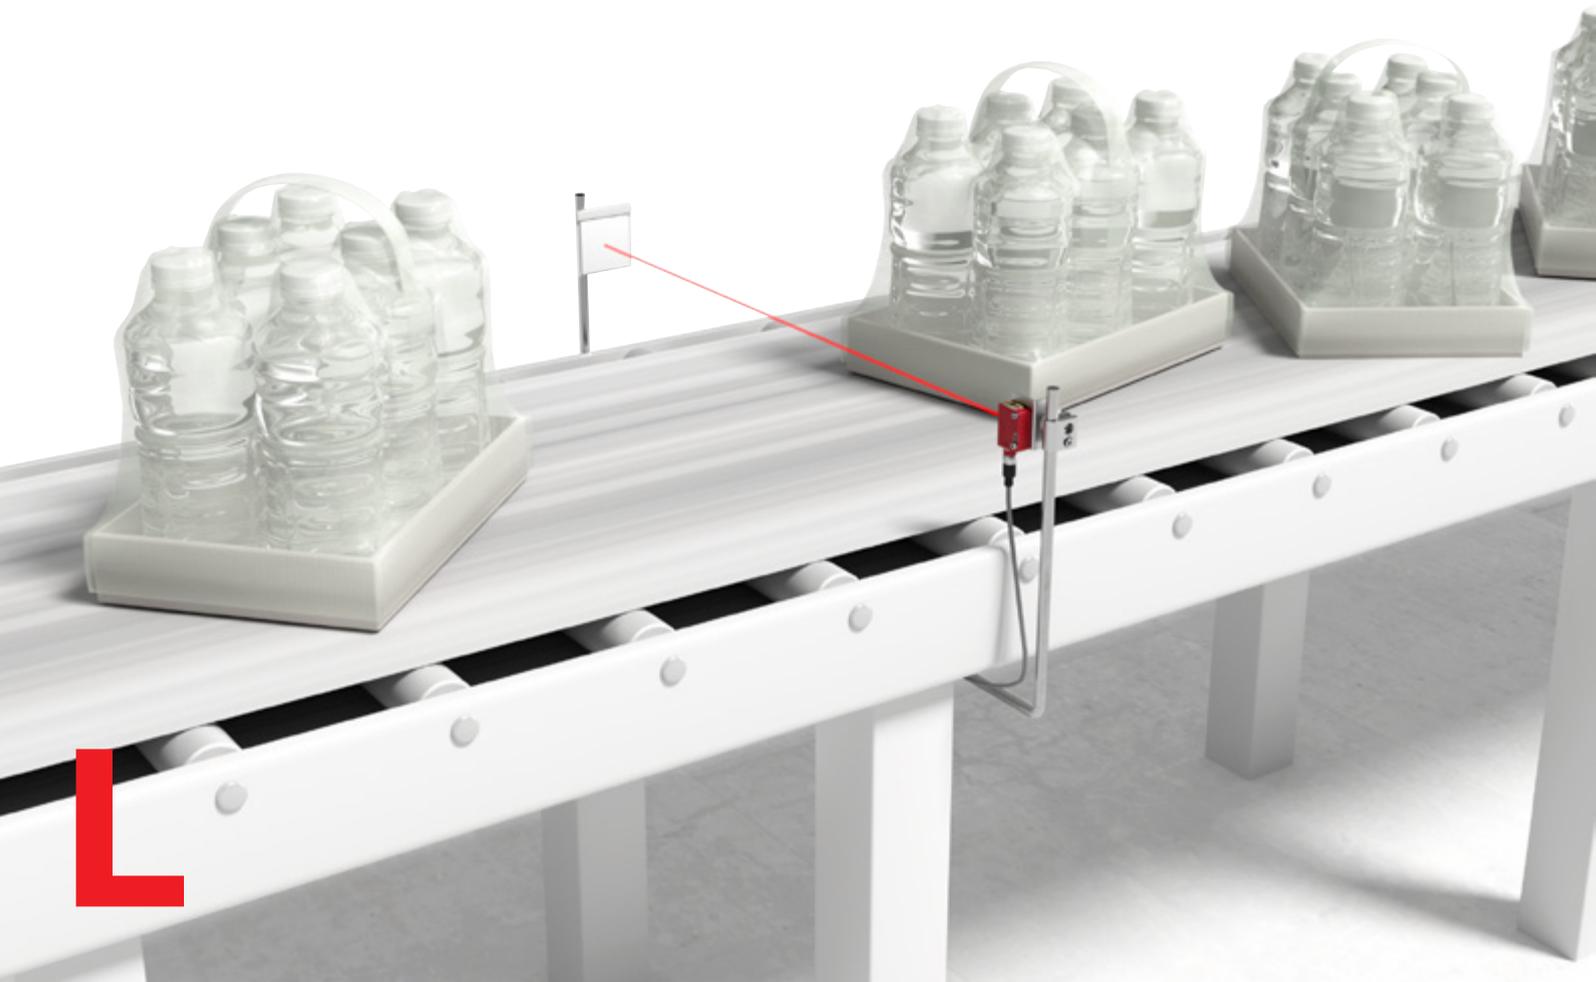

Dependable switching:

All objects and packaging are detected stably and reliably

Using various operating principles and technologies, switching sensors detect objects reliably – at either the start or end point of the application.

We offer a variety of sensors that detect an object optoelectronically, with ultrasonics, inductively or capacitively and output a stable switching signal. We meet the diverse requirements from the production and packaging industry with a large number of different light spots, operating principles, designs and sizes.

The usability when aligning and adjusting the switching point is simple and intuitive for all models. The sensors output standardized switching signals, NPN/PNP as well as dual channel IO-Link data and can, thus, be integrated in all applications. Many series offer helpful additional functions to facilitate service intervals that are as long as possible.

Versatile miniature sensors: short response times, high degree of protection and new mounting bracket

With very long operating ranges, short response times and degrees of protection IP 67 and IP 69K, the 3C series sensors are suitable for applications in assembly, material flow and in the packaging field.

The series offers operating principles and light spot variants for the reliable detection of even transparent objects. The compact sensors are extremely robust and resistant against cleaning agents. This is verified by the ECOLAB certification as well as the highest degrees of protection.

There are two new mounting variants: an integrated M3 threaded sleeve for simple mounting without nuts as well as reinforced through holes.

3C series

- All operating principles available
- Autocollimation with automatic sensitivity readjustment (tracking) for the smallest differences
- Best performance in this size (11 × 34 × 18 mm)
- Range of models with many light spots; switching behavior appropriate for your application
- Degrees of protection IP 67 and IP 69K and ECOLAB certification
- Diffuse reflection sensor with remote function via IO-Link (according to Smart Sensor Profile) as well as 2 independent switching outputs

Active ambient light suppression A ² LS		X	

Properties

Pin-point LED | Powerful interference suppression | 2 inlaid metal sleeves | Sensor with a laser-like light spot | Polarized retro-reflective photoelectric sensor with glass optics

ECOLAB | 2 housings: through holes with metal sleeves or threaded sleeves | Sensor with different light-spot geometry and V-configuration | Laser variants | Teach-in | Bottle detection | Contrast sensors | Detection of labels on bottles | Devices with IO-Link communication interface

The diffuse sensor is intuitively operated via multturn potentiometer | Indicator LEDs with all-round visibility | Switching output with either PNP or NPN design

* Typical operating range limit

Simple mounting by means of integrated threaded sleeves
 | Flexible cable outlet to the rear or downward
 | Fast alignment through *brightvision*
 | Detection of semitransparent media
 | Teach variants available
 | Detection of empty bottles

Universal front- and plug-side M18-hole mounting option
 | Easy through-hole assembly with anti-rotation protection for mounting nuts on the housing
 | Fast alignment through *brightvision*

ECOLAB, M4 metal threaded sleeves, sensors with small and long light spot
 | Sensor for bay positioning / for the detection of broken containers
 | Focused light spot
 | Foreground suppression
 | High function reserve
 | For stretch-wrapped packages
 | Bottle detection
 | Laser variants
 | Teach-in
 | Dynamic reference diffuse sensor
 | Long-range sensor
 | IO-Link interface

Mechanically adjustable operating range
 | Sensitivity adjustment
 | Retro-reflective sensor with large function reserve / for stretch-wrapped containers

Different versions available:
 | Short housing design
 | Increased range
 | AC/DC device versions
 | Antivalent switching output

Full stainless steel housing
 from a single piece (V2A & V4A)
 | Resistant against vibration and
 pressure shocks | Mechanically
 resistant against impacts on the
 active surface | Also available as
 a model with 316L stainless steel
 (ECOLAB) suitable for use in
 hygienic applications | Correction
 factor 1 (material-independent
 detection)

Cubic miniature housing
 | Versions with increased operat-
 ing range

Bright status display | Antivalent
 switching outputs (NO+NC)
 | Increased ranges | M12 plug,
 turnable 270° and thus suitable
 even for angled connection
 cables | 360° visibility through
 4-way LED indicator on the
 sensor head

Double sheet monitoring / splice detection

DB 12B, 112B, 14B
Double sheet monitoring
VSU 12/IGSU 14D
Splice detection

Description

The double-sheet monitoring systems reliably prevent the infeed of multiple sheets. This helps reliably prevent damage and the creation of scrap in machines that process paper and cardboard stacks. The systems operate on the basis of various physical principles and are thus able to cover nearly the entire range of applications. Splice detections reliably detect the splice on paper or plastic webs in paper- or foil-processing machines.

Typical applications

Double sheet detection of

- Paper sheets
- Cardboard sheets
- Films

Splice detection, e.g. on

- Paper rolls
- Paper and plastic webs

Technical information

Physical principles:

- Capacitive
- Ultrasonics (Ø 12 mm or 18 mm, short construction)

Working ranges:

- From 20 g/m² ... 1,200 g/m² (cardboard thickness 2 mm)
- Detection of 1/2 or 2/3 plies
- Outputs for single or double sheets
- Configuration facility

Models:

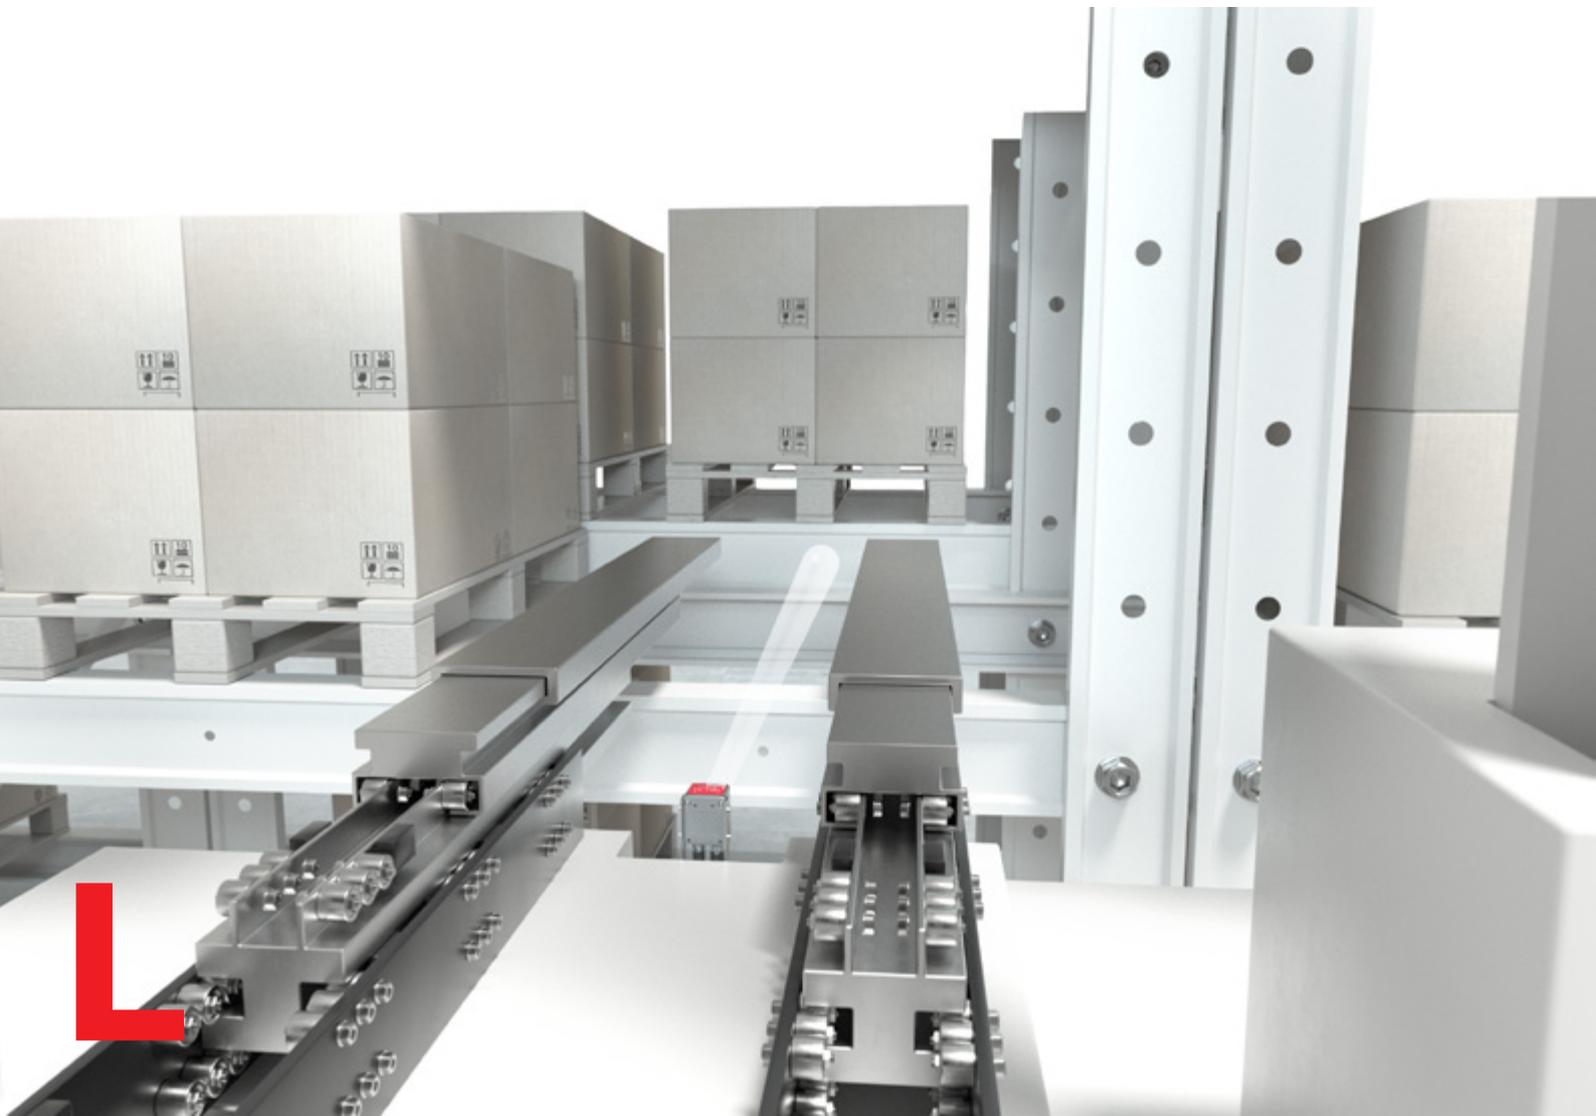

- Individual components (M12, M18)
- Compact fork designs

Measuring sensors

Intelligent monitoring and control through measuring sensors

Measuring sensors can actively check distances, position system parts and monitor other parameters in order to intelligently and independently initiate actions and, e.g., intervene in processes for control purposes.

We offer a large selection of different sensor technologies and designs that you can use to find solutions to measuring applications. Various powerful technologies facilitate optimum adaptation of our measuring sensors to a wide range of application requirements. Depending on the application, various communication interfaces are also available, such as IO-Link, bus interfaces or Ethernet-based interfaces.

Forward-looking compartment fine positioning with camera-based positioning system

The camera-based IPS 200i and IPS 400i sensors are for the compartment fine positioning of the chassis and lifting unit of the high-bay storage device in front of single- or double-depth shelf compartments.

Any deviations from the target reference position that occur during absolute positioning are thereby detected. The reference position is defined by simple bore holes or reflectors in the steel profiles in the shelf compartments. If the bore hole is located in the working range of the sensor, it delivers the current position relative to the reference position via the integrated Ethernet TCP/IP or PROFINET interface or via 4 digital switching outputs. When the current absolute and reference positions match, the ideal positioning of the high-bay storage device is reached.

Smallest size, simple operation, configuration via the integrated web server or directly on the sensor via configuration codes are just a few of the highlights of this device.

IPS 200i / 400i series

- Extremely small, camera-based positioning sensor
- Simple commissioning through printed configuration codes located directly on the device
- Fault-free use for a working range of up to 2,400 mm
- With Ethernet and PROFINET

Products for safety at work

From a single source: Products and services that protect the operator and facilitate efficient processes

Machine safety no longer means just personnel protection. It also makes an important contribution to the efficient and smooth flow of processes.

As one of the technology leaders in the area of optoelectronic safety sensors, we offer competent and extensive consultation on the topic of safety at work. In addition to our wide range of safety sensors, we also offer safety switches and safety locking devices as well as safe control components. We provide you with well thought-out and reliable solutions for safety at work from a single source.

In doing so, we place great importance on the simple and efficient integration and installation of our safety technology. Innovative connection concepts, integrated alignment aids, operating mode selection without PC and integrated gateway functions are just a few examples here.

Highly efficient safety laser scanner: clever area protection and access guarding

With the RSL 400 safety laser scanner, we have set a new standard worldwide in the supreme discipline of safety sensor technology.

Thanks to our decades of experience, we have succeeded in developing a device which, through clever detailed solutions, combines reliable operation with simple configuration and installation of devices.

In many cases the RSL 400 can even be used to perform tasks that previously required two safety laser scanners.

RSL 400

- Scanning angle of 270° and operating range of 8.25 m
- Easy-to-mount, removable measuring unit for simple and quick exchange
- 2 independent protective functions in one device
- PROFINET/PROFIsafe interface for simple integration in industrial networks 
- High-quality data output for navigation of automated guided vehicles and first-class safety technology in a single device

Protective sensor sets and accessories

UDC / DC
Device columns

UMC
Mirror columns

MLC-UDC
Protective sensor sets

Description

The UDC / DC device columns enable the stable, freestanding mounting of protective sensors and safety light curtains on the floor. The robust profile construction in high-quality design will win you over with simple device mounting and the quick vertical and axial alignment in just a few steps.

By combining UMC mirror columns with protective sensors or safety light curtains, cost-effective, multiple-side danger zone guarding can be realized. Robust design and simple handling also increase the effectiveness of the safety device.

In addition to the MLC 500 safety light curtain as an optical protective device, these sets also include device columns in which the safety sensor is pre-mounted in such a manner that it can very easily be height-adjusted.

Properties

Simple, stepless mounting and height adjustment of the installed devices by means of supplied mounting brackets. Design with closed or open top by means of simple, snap-in column cover. Protection against device contamination and damage by means of easy-to-replace protective screens (PSC). Automatic resetting after mechanical impacts with special spring elements (UDC). Complete mounting set for floor fixing included with delivery (UDC).

Individual mirror, adjustable separately in height and alignment, for beam deflection with multiple light beam safety devices. Axially adjustable continuous mirror surface for beam deflection with safety light curtains. Automatic resetting after mechanical impacts with special spring elements. Complete mounting set for floor fixing included with delivery.

Transmitter-receiver system with safety light curtain MLC 500. Set for access guarding with hand / finger detection. Optimally matched mechanically; pre-mounted and pre-aligned. Device column with complete mounting kit for exact floor alignment; automatic resetting after mechanical impacts thanks to special spring elements.

Set-AC-M
Muting sensor sets

MLDSET
Protective sensor sets

M4 / M7
Muting indicators

In addition to the MLD 500 multiple light beam safety device as an optical protective device, these sets also include device columns in which the safety sensor is pre-mounted in such a manner that it can very easily be height-adjusted.

The Set-AC-M muting sensor sets for protective sensors and safety light curtains simplify the setup and operation of muting solutions | The sets are optimally tailored to modern machines and systems both mechanically and electrically and through their innovative design

The MLDSET protective sensor sets offer complete solutions for access guarding in which muting functions are needed for material transport | The pre-mounted sets ensure efficient installation and quick and easy commissioning. Tailored to various muting tasks, a number of Plug & Play models are available

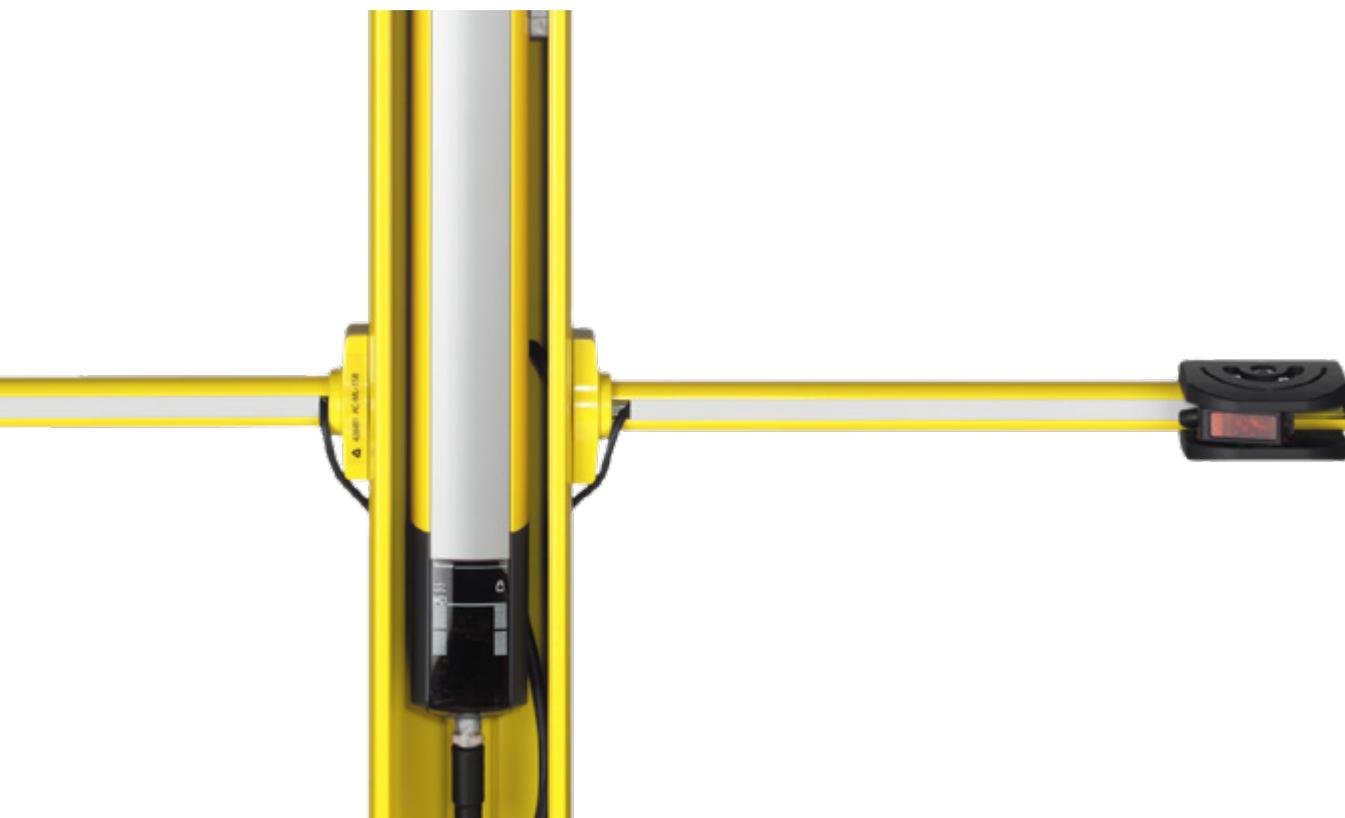

The M4 and M7 muting indicators are used for the reliable display of the muting state in safety-relevant applications | They are used in combination with protective sensors or safety light curtains

Plug & Play solutions, optionally as transceiver or transmitter-receiver system | Set for access guarding, i.e. pre-mounted transmitter / receiver or transceiver / deflecting mirror in device column | Optimally matched mechanically; pre-mounted and pre-aligned | Device column with complete mounting kit for exact floor alignment; automatic resetting after mechanical impacts thanks to special spring elements

Pre-mounted and aligned muting sensors for direct connection to the safety sensors | 2-sensor muting (timing controlled & sequential); 4-sensor muting (timing controlled) | Simple lateral mounting on device columns as well as on protective sensors and safety light curtains | Optimally matched to transceiver systems through the use of retro-reflective photo-electric sensors (only one-sided wiring) | Fast start-up through immediately ready-to-use, turnkey design

Pre-mounted and aligned protective sensor systems in device columns for direct integration in machine and system controls | 2-sensor muting (timing controlled & sequential); 4-sensor muting (timing controlled) | Simple logistical handling through individual complete solutions in a single set | Fast start-up of the complete system through immediately ready-to-use, turnkey design with pluggable connections

Simple mounting and commissioning, since M12 connector, interconnection cable (2 m), mounting bracket and mounting kit are included in the scope of delivery and are pre-mounted | Low risk of failure through the use of LEDs with a life expectancy of at least 100,000 hours | Modern design through the use of a clear housing, signal indicator with white continuous light | UL approval and high degree of protection IP 66

 | System signal output

Properties

Up to 31 safe AS-i slaves can be connected | Freely selectable assignment (Drag&Drop) of the sensors to OSSDs with "asimon" PC software | 32 logic devices (e.g. OR, AND, FLIPFLOP) and turn on/off delays can be configured for the monitoring devices | RS 232 interface for PC-supported system configuration and system diagnosis as well as configuration data transfer to replacement device | Immediate switch-off STOP 0 and delayed switch-off STOP 1 of the release circuits can be configured | Teach-in SERVICE button for automatic system integration of AS-i sensors on sensor exchange

Safe activation of safe AS-i actors with the same safe AS-i address | Primary start and E-Stop functions via safe coupling of neighboring AS-i networks | 48 logic devices (e.g. OR, AND, FLIPFLOP) and turn on/off delays can be configured for the monitoring devices | Auxiliary signals for start/restart interlock | Error reset of the AS-i actor | In addition, all functions and features of the ASM1E safety monitor are available

Safety switches and safety locking devices

S20, S200 Safety switches

S300 Safety position switches

Specifications

Type	Type 2 interlock device without guard interlocking in acc. with EN ISO 14119	Type 1 interlock device without guard interlocking in acc. with EN ISO 14119
Housing / Degree of protection	Technopolymer (S20) or metal (S200)/both IP 67	Technopolymer or metal, both IP 67
Actuators	Mechanical tongue, with low coding level in accordance with EN ISO 14119	Actuated by unencoded cam in accordance with EN ISO 14119
Locking type, -force		
Connection type	Cable entry M20 × 1.5 (S20: optional 3-way), M12	Cable entry M20 × 1.5 (1- or 3-way), M12
Certifications	CE (Y) c UL US	CE (Y) c UL US

Functions

Safety switches with separate actuator are ideally suited for safeguarding points of operation by guards on machines without overrun | The coded actuator allows the machine to be started only if protective device is closed

Because of their construction design, these switches are used for the position monitoring of machines or as an alternative to hinge switches – always with the prerequisite that appropriate actuation tappets or notches can actuate the switch when friction closed

Properties

Metal or technopolymer housing | Easy mounting with standard construction | Universal use with 5 actuator approach directions | Up to 8 different actuators | Various contact blocks | 1–3 cable inlets | Versions with M12 connector | High-quality silver contacts for long life expectancy | Positive-opening contacts for integration in a safety circuit

Metal or technopolymer housing | Switching direction selectable | Universal use with individually set actuator approach directions and angles in 10° grid | Various actuators | Extremely durable/robust | Positive-opening contacts for integration in a safety circuit

Min. approach speed of actuator towards sensor	50 mm/s	
Response time	3 ms	7 ms (typical), 12 ms (max.)
Certifications	CE cULus TÜV	CE cULus TÜV

Functions

The magnetically coded sensors are used for monitoring guards
 | Together with a safe evaluation unit from Leuze, a certified system up to category 4 and PL e in accordance with EN ISO 13849-1 can be realized

The sensors of the RD 800 series are used for monitoring guards
 | The unique encoding of the actuator, made possible through RFID technology, offers maximum protection against tampering
 | The sensors are equipped with redundant electronics and OSSD safety outputs

Properties

Contactless actuation without mechanical contacts
 | Output contacts: 2 NC or 1 NC + 1 NO
 | Models with additional signal contact and status LED
 | Models with cable, M8 or M12 connector
 | Various compact designs
 | Simple commissioning
 | Insensitive to soiling
 | Degree of protection IP 67

Long life expectancy, even with frequent operating cycles thanks to contactless actuation
 | Maximum protection against tampering by means of an actuator with low or high coding level in accordance with EN ISO 14119
 | Redundant electronics and OSSD safety outputs for the highest safety level
 | PL e and category 4 in accordance with EN ISO 13849-1 beginning with one device
 | Series connection possible
 | Status display on the sensor and signal contact
 | Models with cable or M12 connector
 | Models with additional programming input for teaching-in actuators
 | Degree of protection IP 67 and IP 69K

ERS 200
E-Stop rope switch

ESB 200
E-Stop button

Specifications

Type	E-Stop command device in accordance with EN ISO 13850, EN 60947-5-5	E-Stop command device in accordance with EN ISO 13850, EN 60947-5-5
Housing / Degree of protection	Metal, IP 67	UV-resistant, impact-resistant plastic, IP 67, IP 69K
Actuators	Stainless steel bolt, red, steel rope with sheathing	Button, 40 mm diameter, red, self-locking
Actuation	Position-independent per rope (pull: 83 N / 235 N, slacken: 63 N / 147 N). Pull on forced separation: 90 N / 250 N.	Position-dependent, manual, per button (25 N)
Mounting	Straight, angular	Structure
Connection type	Cable entry M20 × 1.5 (1- or 3-way), M12	Cable entry M20 × 1.5, M16 × 1.5 M12
Certifications	   	

Functions

	Integration in control circuits up to category 4 in accordance with EN ISO 13849-1 Position-independent E-Stop command input Reset function (reset button with indicator) Rope head with alignment indicator	Integration in control circuits up to category 4 in accordance with EN ISO 13849-1 Position-dependent E-Stop command input. Reset function (via rotary knob or key)
--	--	---

Properties

	Machine is stopped by pulling the rope or on rope breakage Simple rope adjustment by means of switching point indicator Clicks in on both sides with friction-locking contacts Compact metal housing Use even under difficult conditions Precise bolt guide	2 safety circuits, 1 signal circuit Either screw terminals or M12 connection Sturdy housing Protected screw fitting Ergonomically optimized

Safe extension modules
 | Each base module can be expanded by up to 12 freely selectable extension modules

Non-safe extension modules for economical actuation of non-safety relevant elements (e.g., signal lights) | Each base module can be expanded by up to 12 freely selectable extension modules

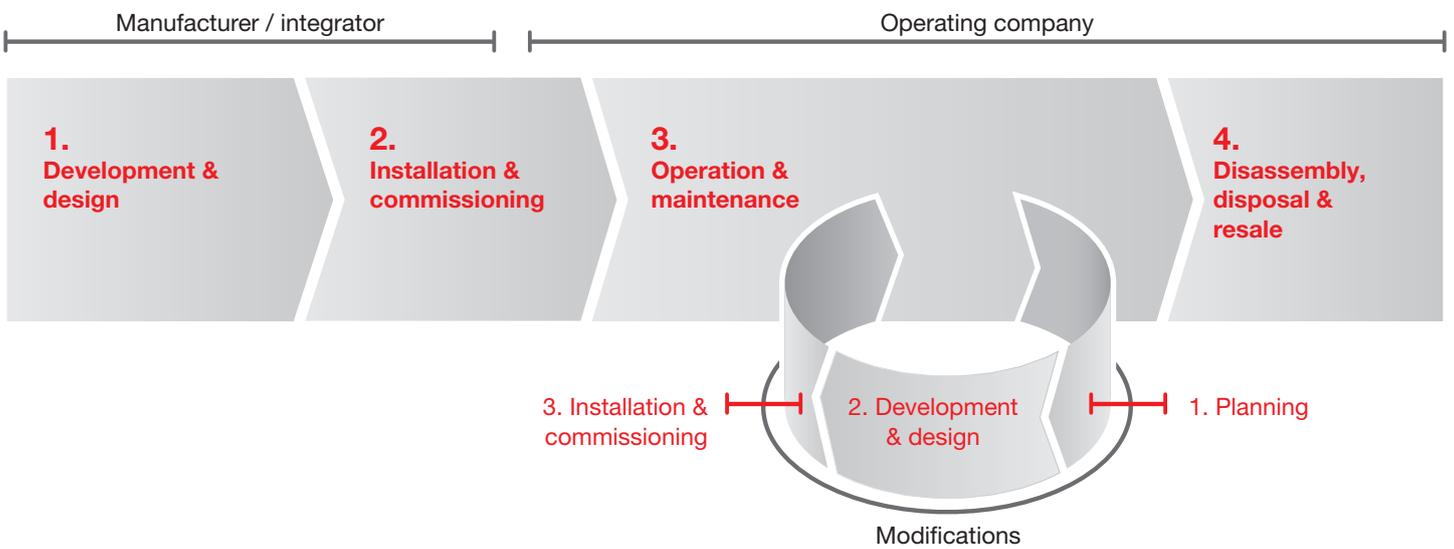

Each base module can be expanded with up to 2 gateway modules

Configuration via MSI.designer configuration software (license-free): supports up to 300 function blocks in one project, integrated simulation with logic analyzer, configurable report, online diagnosis | Removable program memory in SD card format, 512 MB | Designs with screw or spring-cage terminals

Machine Safety Services

Sustainable machine safety begins with professional planning of the safety systems and spans the entire lifecycle of a machine. Our teams of experienced and certified experts offer the appropriate support here.

Stages of a machine life cycle

When designing and constructing machines, we create the safety-related concept together with you and support you in its realization. During operation, we regularly perform tests to ensure the permanent function of the safety systems. If changes are made to existing machines, we provide you with support on everything from the safety-related planning to renewed commissioning.

Through our services, you benefit from our many years of experience in the area of machine safety and our extensive industry and application knowledge. Efficient safety-related solutions for every phase of a machine's life cycle are thereby created together.

Our service offerings

Status check: 'safety technology on machines and systems'

- Our experts analyze the safety-related condition of your machinery and check whether the current safety-related requirements are satisfied in accordance with the current state of the art.
- In the event of deviations, we provide recommendations on what corrections can be performed so as to comply with legal requirements.

Risk assessment and hazard evaluation

In accordance with applicable directives, the manufacturer of a machine is required to perform a risk assessment. This also applies in the case of significant modifications or extensions of machines.

The national regulations for the operation of machines require employers to conduct a hazard evaluation before using work equipment and to update this assessment at regular intervals according to the current state of the art.

- Our experts support you in identifying the dangers, in assessing and evaluating the risks as well as in defining the risk-reducing measures.

Inspection of protective devices

- Within the scope of the initial or regular inspection, we check the condition, mounting and correct function of the protective device as well as the correct integration in the safe part of the machine control
- We summarize the results of the tests in a detailed report.
If necessary, this includes practically oriented suggestions on how deviations can be corrected.

Stopping time measurement

For the correct placement of the protective device, the required minimum distance between protective device and dangerous movements is to be calculated. To do this, the stopping time of the machine must be known. With the stopping time measurement, we determine this value reliably.

- By measuring the stopping time within the scope of regular inspections, any wear, such in brake components, can be detected in good time.

Status check: 'CE marking of machines'

During the development of machines, the specifications from the machinery directive must be adhered to and documented by the manufacturer. This is confirmed with the Declaration of Conformity and the CE marking.

- We check the documentation for completeness and give recommendations of how any deviations can be corrected.

Conformity assessment in accordance with the European machinery directive

The machinery directive defines the procedure for the design and construction of machines for satisfying the applicable safety and health protection requirements. This is a prerequisite for the Declaration of Conformity and the CE marking.

- We help you comply with and implement the legal requirements of the machinery directive.

Safety concept and safety design

The measures necessary for risk minimization are known from the risk analysis.

The safety concept and the safety functions are developed on the basis of these requirements.

- With our extensive industry knowledge and our many years of safety-related experience, we create practically oriented concept proposals for you and support you during their implementation.

Verification and validation

To avoid errors during the implementation of safety functions, both the hardware as well as the software must be checked to determine whether the requirements of the functional specification were met completely and correctly. The function test of all safety functions is to be performed according to the validation plan.

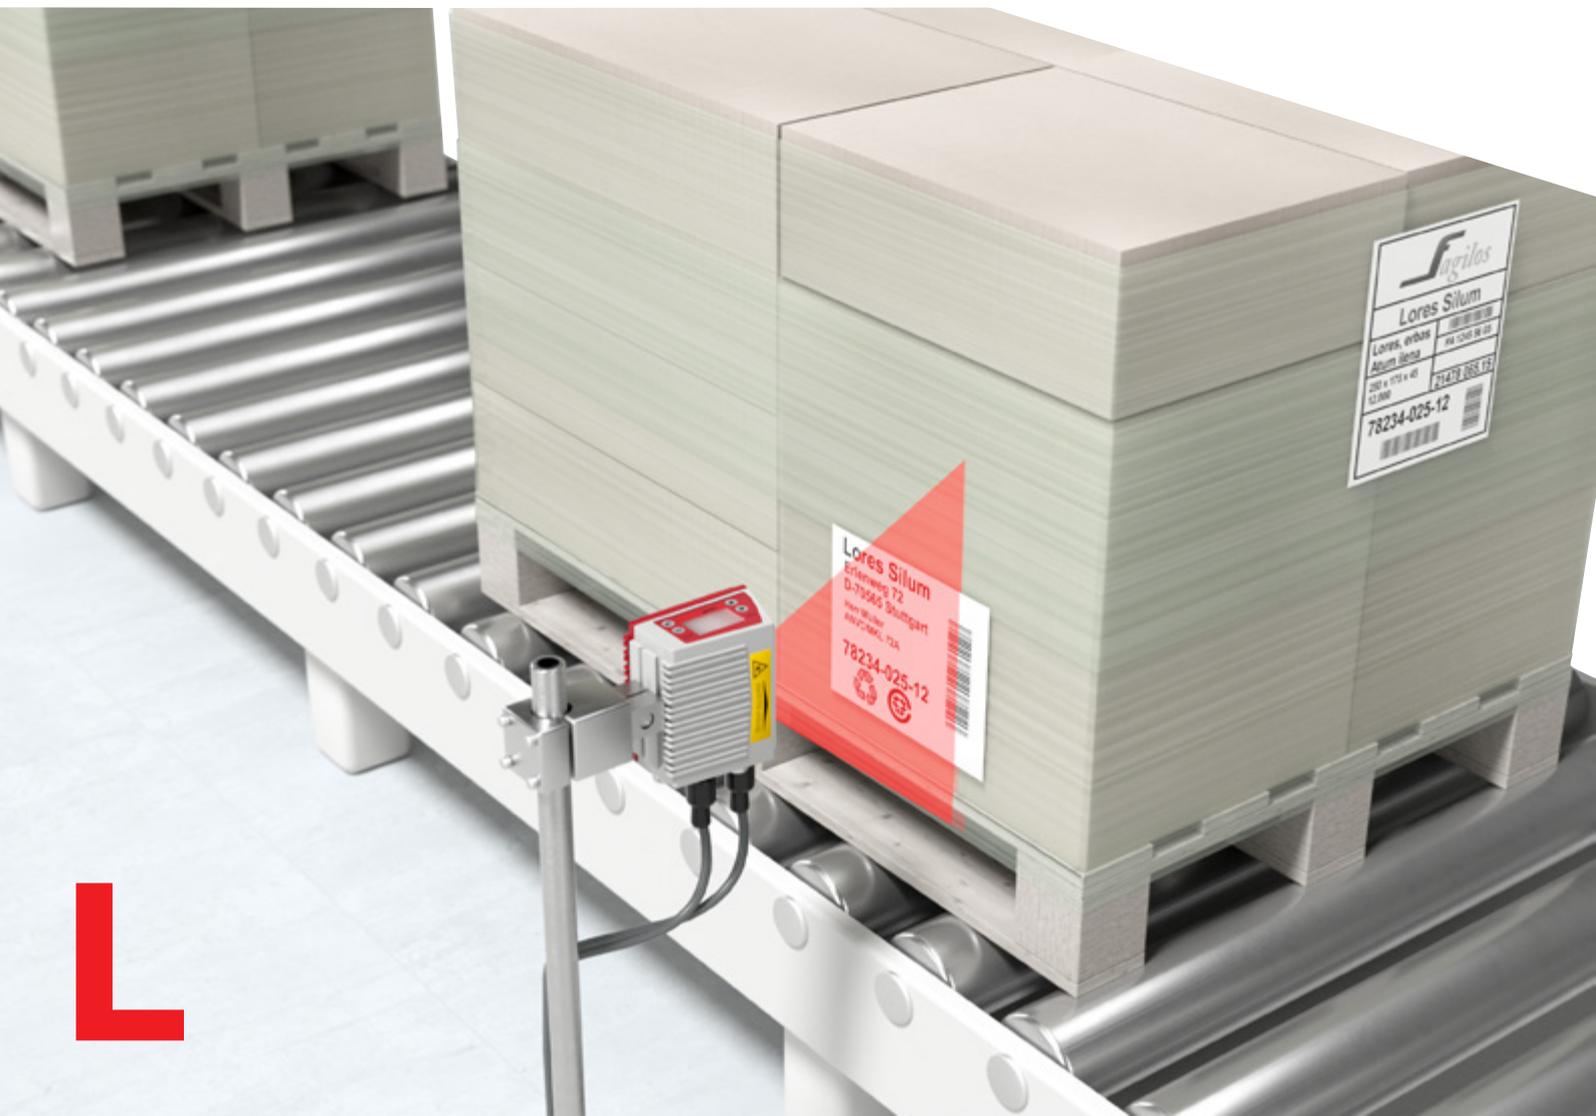

- We support you during the planning, development and execution of the function tests as well as with the creation of the required documentation.

Identification

Reliably detected:
Automatic bar code identification for continuous traceability

In many areas of production and logistics, goods and materials are labeled with bar codes or 2D-codes. They are used for identification in the automation process and simultaneously ensure the traceability of the production and packaging process of every single product.

We offer various technologies for reading these codes: e.g. mobile hand-held scanners for bar codes, 2D-codes or DPM codes, stationary laser scanners in line or raster scanner versions as well as high-speed scanners or scanners for the deep-freeze area with integrated heating.

Precise bar code reader: the latest technology and numerous equipment options

For gapless product traceability, automatic identification of 1D- or 2D-codes is essential. The BCL 300i stationary bar code reader is used primarily for the reliable identification of bar codes on containers and packages.

With the innovative code reconstruction technology, even soiled or damaged codes can be reliably detected. This increases system availability.

Through the modular design with many equipment options, the BCL 300i can be adapted flexibly and optimally to your specific application.

BCL 300i

- Modular connection technology through pluggable connection hoods
- Integrated fieldbus interfaces, such as PROFINET or Ethernet IP
- Variants as line scanners, raster scanners, deflecting and oscillating mirrors available
- Code reconstruction technology (CRT) for reliable identification of damaged codes
- Optionally with display and heating

BCL 900i Bar code readers

Specifications

Reading distance (dependent on version)	300–1,500 mm	450–1,700 mm
Smallest resolution	0.25 mm	0.33 mm
Scanning rate	800–1,000 scans/s	1,000 scans/s
Optics models	M, F	M
Reading method	Single line scanner Oscillating mirror Code reconstruction technology	Single line scanner Code reconstruction technology
Inputs/outputs	2 / 2	3 / 2
Interfaces	Integrated: RS 232 / 485 / 422 multiNet PROFIBUS PROFINET IO/RT Ethernet TCP/IP, UDP	Integrated: RS 232 / 422 Ethernet TCP/IP, UDP Ethernet IP
Connectivity	With MA 200i connection unit EtherCAT, DeviceNet, CANopen	With MA 900 connection unit RS 232 / 422, Ethernet TCP/IP, UDP, Ethernet/IP, With MA 200i connection unit PROFINET IO/RT, PROFIBUS, EtherCAT, DeviceNet, CANopen
Supply voltage	10–30 V DC	10–30 V DC
Degree of protection	IP 65	IP 65
Network master	Integrated	MA 31
Certifications	CE CDRH cUL US	CE CDRH CUL US

Accessories

Optional		Ext. parameter memory
Mounting devices	BT 56, BT 59	BT 900

Properties

“webConfig” software integrated in the device permits configuration via USB interface without additional software | Multiple language menu-driven display | M12 connection type | Integrated fieldbus connectivity for convenient fieldbus link and networking | Code reconstruction technology (CRT) for reliable identification of damaged codes | Optimized for modules from 0.25 to 0.5 mm

Code reconstruction technology (CRT) | Optionally as modular scanner portal (MSP) system

Stationary 2D-code readers

(C-mount model)

Typical applications

Code reading	Data Matrix, bar code, QR-Code, PDF 417, Aztec, GS1 Databar	Data Matrix, bar code, QR-Code, Pharmacode, Aztec, GS1 Databar	Data Matrix Code, bar code, Pharmacode
Sensor / cameras	CMOS (Global Shutter)	CMOS (Global Shutter)	CMOS (Global Shutter)
Resolution (pixel)	844 × 640	1,280 × 960	752 × 480
Focal point	127 mm	U optics: 50 mm N optics: 70 mm M optics: 105 mm F optics: 185 mm L optics: 285 mm	50 mm ... ∞ (focal length 8 mm) 75 mm ... ∞ (focal length 16 mm)
Interfaces	Integrated: RS 232 USB	Integrated: Ethernet TCP/IP, UDP PROFINET IO/RT RS 232 RS 422	Integrated: Ethernet RS 232 TCP/IP , UDP
Connectivity	With MA 21 connection unit multiNet With MA 200i connection unit PROFINET IO/RT PROFIBUS Ethernet TCP/IP, UDP, IP EtherCAT DeviceNet CANopen	With MA 200i connection unit PROFIBUS Ethernet TCP/IP, UDP, IP EtherCAT DeviceNet CANopen	With MA 21 connection unit multiNet With MA 200i connection unit PROFINET IO/RT PROFIBUS EtherCAT DeviceNet CANopen
Digital inputs/outputs	1 / 1	2 / 2	8, configurable
Number of test routines	Memory capacity for 1 parameter set in the camera	Memory capacity for 1 parameter set in the camera	Typically 10 to 60, depending on scope of test
Configuration / Operating system	Configuration via bar code or PC with setup program	Configuration via configuration codes or via PC using standard web browser without software to be installed additionally (web-Config tool)	Configuration via PC using standard Web browser without software to be installed additionally (webConfig tool)
Options	Optional: connection cables. Mounting devices: BTU 300M, BT 8-0	Optional: connection cables Optical filters. Housing hoods External illumination Mounting devices: BTU 320M-D12, BT 320M. MA 150 modular connection unit	Reading of directly marked Data Matrix Codes Multiple code reading Display of the code content Evaluation of the code quality of printed codes Reference code comparison Image memory Optional: connection cables, optical filters Mounting devices: BT 56, BT 59
Dimensions, W × H × D	47 × 40 × 32 mm	43 × 61 × 44 mm	75 × 113 × 55 mm 75 × 113 × 106 mm
Certifications	CE cUL US	CE cUL US	CE cUL US

Properties

Camera system for omnidirectional reading of bar codes and 2D-codes | Integrated illumination and decoder | Degree of protection IP 65

Camera system for omnidirectional reading of bar codes, stacked codes and 2D-codes | Integrated illumination (type-dependent: red or IR) | High object speed of up to 7 m/s | Integrated teach functions for simple adjustments via buttons | Optional robust stainless steel housing | Optional with NPN switching inputs/outputs

Camera system for omnidirectional reading of bar codes and 2D-codes | Integrated illumination (depends on type: white, IR or RGBW) and decoder | Degree of protection IP 65 / IP 67 | Flexible use through motor-driven focus adjustment

Stationary 2D-code readers

DCR 50, 55 Stationary 2D-code readers

Typical applications

Code reading	All common 1D-codes such as EAN/UPC GS1 DataBar, Pharma-code and all common 2D-codes such as Data Matrix, QR code or Aztec
Sensor / cameras	CMOS (Rolling Shutter)
Resolution (pixel)	1280 × 960
Focal point	85 mm
Interfaces	Integrated: RS 232, USB (DCR 55)
Digital inputs/outputs	1 / 1
Configuration / Operating system	Configuration with the "Leuze Sensor Studio" Alternatively, via online commands or configuration codes
Options	MA-CR adapter circuit board for test purposes
Dimensions, W × H × D	31.6 × 12.7 × 27.5 mm 31.5 × 20 × 40.3 mm
Certifications	CE cUL US*

Properties

Compact code reader as module or in aluminum housing | CMOS imager and integrated decoder for all commonly used 1D and 2D codes | RS 232 or USB interface, one trigger input, one switching output, degree of protection IP 54

* only DCR 55

RFI 32
Stationary
RFID readers

RFM 12, 32, 62
Stationary RFID
read/write systems

Specifications

Working frequency	125kHz	13.56 MHz
Max. RFID reading distance	80 mm	400 mm
Max. speed	6.0 m/s	6.0 m/s
Interfaces	Integrated: RS 232	Integrated: RS 232
Connectivity	With MA 21 connection unit multiNet With MA 200i connection unit PROFINET IO/RT PROFIBUS Ethernet TCP/IP, UDP EtherCAT DeviceNet EtherNet/IP CANopen	With MA 21 connection unit multiNet With MA 200i connection unit PROFINET IO/RT PROFIBUS Ethernet TCP/IP, UDP EtherCAT DeviceNet EtherNet/IP CANopen
Function	RFID reading	RFID reading / writing
Possible transponder types	– Disc – High temperature proof up to 200 °C	– Disc – High temperature proof up to 250 °C – Smart label
Supply voltage	12–30 V DC	12–30 V DC
Degree of protection	IP 65	IP 65 / IP 67
Certifications	CE	CE

Properties

Compact RFID reading unit
| High degree of protection for tough industrial application
| Mounting also in between conveyor rollers

Compact RFID write/read unit
| High degree of protection for tough industrial application
| Mounting also in between conveyor rollers | RFM 32 is also available as device with Ex certification

Data transmission

Contact-free transmission of information by means of infrared light

Optical data transmission enables transparent, contact-free and wear-free transmission of industrial Ethernet protocols through light emissions.

This technology is used with high-bay storage devices, side-tracking skates, electroplating plants as well as gantry cranes. We offer optical data transceivers with various operating ranges and different Ethernet networks. The sensors are characterized by their easy alignment with integrated laser alignment aid, an integrated diagnosis function as well as a bar graph indicator, thereby allowing them to be quickly put into operation.

Data transmission photoelectric sensor with integrated web server for remote diagnosis

With a bandwidth of 100 Mbit/s, the DDLS 500 data transmission photoelectric sensor enables contact-free communication wherever WLAN or wired transmission systems are pushed to their limits. The integrated web server, which can handle remote diagnosis, is globally unique.

The DDLS 500 also stands out as a PROFINET participant with real-time data transmission over 200 meters. Models available with various operating ranges and interface protocols. Furthermore, we offer optional equipment features, such as a laser pointer for alignment or optics heating.

DDLS 500

- Pre-mounted mounting and alignment plate
- Operating ranges of 40m, 120m and 200m
- Optionally with heating, web server and laser alignment aid
- Can be used for all industrial Ethernet networks as well as TCP/IP communication

Optical data transmission

DDLS 200

Specifications

Operating range	120, 200, 300, 500m	40, 120, 200m
Light source	Infrared LED	Infrared laser (laser class 1)
Transmission rate	2 Mbit/s	100 Mbit/s
Interfaces	PROFIBUS CAN DeviceNet Interbus Rockwell DH+ or RIO RS 422	PROFINET EtherNet IP EtherNet TCP/IP EtherCAT UDP
Degree of protection	IP 65	IP 65
Supply voltage	18–30 V DC	18–30 V DC
Operating temperature	–5 °C ... +50 °C (–30 °C ... +50 °C with heating)	–5 °C ... +50 °C (–35 °C ... +50 °C with heating)
Certifications	CE cULus	CE CDRH cULus

Properties

No-contact, wear-free data transmission | Integrated mounting and alignment plate
| Optionally with heating

Transparent, real-time transmission of all TCP/IP- and UDP-based protocols | Very simple diagnosis of the transmission technology | Pre-mounted and complete delivery of all mounting and alignment elements
| Integrated laser pointer for simple alignment (available optionally) | Simple remote diagnosis via web browser-based user interface (available optionally)
| Device models as PROFINET network participants

Network and connection technology

Correctly connected: with our extensive range of connections for all areas of automation

Sensors are integrated in control and automation processes using connection technology. Depending on production conditions, the connection types have different advantages.

We offer you an extensive range of connections, from the cable, to the connector and connection box to the IO-Link master for applications without primary control or hybrid solutions.

The connectors and interconnection cables are available in various materials and versions for all requirements and applications in the area of automation. Our wide product range affords you maximum flexibility in the planning of your machine.

Flexible communication: from the field to the cloud. For applications without primary control or hybrid solutions

With the MD 700 and MD 200, we have IO-Link masters that offer an OPC-UA interface in addition to real-time-capable fieldbus protocols, making them ideal for cloud-based applications as well.

The completely web-based configuration concept offers an optimum stand-alone solution.

IO-Link master with OPC UA

- PROFINET/Ethernet IP interface for simple integration in industrial networks
- Switch cabinet model and field model
- Setup of hybrid systems – the time-critical application coordinates the control – aggregated condition data flows into the cloud
- Module cloning for device exchange and extension to new devices
- Stand-alone system with completely integrated web server, no further software necessary

Certifications	CE cUL US	CE cUL US	CE cUL US

Functions

Sensor-actuator voltage supply, signal transmission

Sensor-actuator voltage supply, signal transmission

Sensor-actuator voltage supply, signal transmission

Properties

Standardized product range for the connection of sensors
 | M8 and M12 connection cables for the connection of sensors in industrial environments | Select from 3-, 4-, 5-, 8-, 12-wire cables
 | Cables made of PUR, PVC, TPE and connectors with or without LED, angled or straight – high flexibility for many applications
 | Sensor-actuator cables satisfy the highest demands, are shock and vibration resistant, offer very bright LEDs and satisfy degrees of protection IP 65 and IP 67 (optionally IP 69K)

User-configurable connectors afford maximum flexibility when planning the machine
 | Individual cable lengths possible

Proper connection cable for passive distribution boxes
 | M12 or M23 – in 8- 12- or 19-pin version, straight or angled, cables made of PUR or PVC – high flexibility for many applications

Passive distribution boxes

**MD 200i, 700i
IO-Link master**

**MD 708
Ethernet switch**

Specifications

Functions

OPC UA
IO-Link

Properties

Passive distribution boxes for easy bundling of sensors
 | Mounting holes in the middle and additional fixing holes on the side enable flexible mounting on all standard profiles and mounting plates | Ideal for harsh industrial conditions through vibration and shock resistance | Best fit accuracy of the connectors

For the connection of up to 8 IO-Link devices | Devices for field use or installation in switch cabinets | Parallel data exchange with control and the IT world
 | Models with OPC UA as standardized model for transferring data from the field level to the cloud | Stand-alone system with completely integrated web server, no further software necessary
 | Module cloning for device exchange and extension to new devices

Robust design for harsh conditions | Mounting holes in the middle and additional fixing holes on the side enable flexible mounting on all standard profiles and mounting plates
 | Compatible design
 | Unmanaged switch
 | Auto negotiation
 | Auto crossing
 | Full duplex

Industrial image processing

Picture-perfect connection: innovative smart-camera technology paired with our code-reading competence

The product family includes devices for bar code and 2D-code reading as well as powerful tools for volume monitoring via edge scanning or for completeness and presence control through BLOB analysis.

In material processing, it is often necessary to monitor areas and processes that the system operator cannot access. Also under harsh ambient conditions. Our LCAM 408i industrial IP camera provides this insight – even in real-time. It allows individual process steps to be checked during the production of products.

The LSIS 400i smart camera is used above all for object detection, position determination or quality assurance in manufacturing processes.

High-performance camera technology: fast identification and economical quality assurance

The LSIS 462i smart camera is used anywhere different labels must be detected and evaluated at high speed. It reads printed and directly marked 1D- or 2D-codes absolutely reliably – independent of contrast.

In addition to BLOB analysis and code reading, it is now also possible to measure distances and geometric shapes such as circles, lines and edges, with a user interface.

Due to the broad function range, the LSIS 462i is, in many, ways the best and most efficient solution for quality inspection, code reading and measurement tasks.

LSIS 462i

- 3 functions in one device (BLOB analysis, code reading, measurement through edge scanning)
- Fast integration via standard web browser
- Integrated display and well-structured software simplify operation
- All parameters are stored in the device and enable high availability
- Pulsed or continuous operation depending on the application

Accessories and supplementary products

Smooth running: Full performance with the right accessories and perfectly matched components

Efficient work requires more than just a sensor. Almost as important are the appropriate accessories, which allow the sensor to utilize its full functionality. No matter if you need easy mounting, uncomplicated connection or reliable signaling, you can easily find the right accessories for your application in our extensive product range.

You can find our complete accessories range on our website at www.leuze.com/en/accessories.

Cables

To facilitate the integration of our sensors, we offer a large variety of connection and interconnection cables with M8, M12, and M23 connectors – straight or angled, and with or without LED.

Mounting systems

We place great emphasis on our products being easy to mount and simple to align. For this reason, you will find specially-attuned mounting systems in our product range such as mounting brackets, rod holders or device columns.

Connection units

Today, sensors, safety switches and cameras are linked together via active or passive sensor distribution boxes with fieldbus interfaces from our product range to ensure more flexibility and transparency during installation.

Reflectors

Just how reliably retro-reflective photoelectric sensors can detect depends upon the selected reflector, among other things. That is why we offer various fitting solutions made of plastic, film, and glass for all conceivable conditions.

Power supply

A reliable and machine-independent power supply with 1- and 3-phase power supplies is an elementary part of an optimum and efficient sensor system. For this reason, we also offer load circuit monitoring modules to ensure a higher level of safeguarding against failure.

Signaling devices

For signaling in automated systems, we offer an extensive product range of single- and multi-colored transducers in order to ensure productivity and efficiency.

Optical & acoustic signaling for displaying machine states

Properties

Flexible configuration: 6 different colors (red, orange, yellow, green, blue, white)
 | Simple mounting: base mounting: 3 stand heights with plastic foot, flat mounting variant with and without M12 connector, hinged mounting variant
 | Module connection via bayonet lock
 | Position-independent – protection against interchanging
 | Transparent calottes / uniform clear glass optics
 | Single-sound & multi-sound buzzer modules (up to 105 dB)
 | Preassembled models & freely configurable elements
 | Signal image: continuous light & flashing light
 | Multicolor with 7 different colors

6 different colors (red, orange, green, blue, white, yellow)
 | Base mounting, bracket mounting, horizontal mounting
 | Single-sound buzzer module
 | Preassembled models & freely configurable elements
 | Signal image: continuous light & flashing light

Various installation versions: signaling columns, panel-mount modules, multitone & beacon

Mounting systems

Mounting bracket

Rod mounting

Other mounting systems

Specifications

Material	Galvanized steel, stainless steel	Galvanized steel, stainless steel, aluminum	Galvanized steel, stainless steel, aluminum, plastic
Mounting at device	Screw type	Screw type	Screw type or clampable
Mounting at system	Screw type	Clampable on rod	Screw type

Functions

	Mounting bracket with possibility for device alignment	Mounting bracket with flexible alignment and alignment function for the device	Fixed mounting, with limit stop in some cases
--	--	--	---

Properties

	Diverse versions for various sensors	Diverse versions for various sensors and reflectors	Diverse versions for various sensors with cylindrical design
--	--------------------------------------	---	--

Reflectors

Standard reflectors, micro-triad-type reflectors

Reflective tapes

Reflectors

Specifications

Material	PMMA	PMMA	Stainless steel and scratch-resistant plastics
Triple reflector size	0.3–4 mm	0.3–4 mm	0.3–4 mm

Functions

	Various sizes, from 20 to 180 mm	Various films from 9 to 920 mm, also available as rolls of 45.7 m	Different designs available
--	----------------------------------	---	-----------------------------

Properties

	Adhesive, pluggable and screw-type versions	Adhesive and self-adhesive versions	Adhesive, clampable and screw-type versions Versions with increased resistance for intensive use of cleaning agents
--	---	-------------------------------------	---

Our product range at a glance

Switching sensors

- Optical Sensors
- Inductive Switches
- Capacitive Sensors
- Ultrasonic Sensors
- Fiber Optic Sensors
- Forked Sensors
- Light Curtains
- Special Sensors

Measuring sensors

- Distance Sensors
- Sensors for Positioning
- 3D Sensors
- Light Curtains
- Bar Code Positioning Systems
- Forked Sensors

Products for Safety at Work

- Optoelectronic Safety Sensors
- Safe Locking Devices, Switches and Proximity Sensors
- Safe Control Components
- Machine Safety Services

Identification

- Bar Code Identification
- 2D-Code Identification
- RF Identification

Data Transmission

- Optical Data Transmission Systems

Network and connection technology

- Connection Technology
- Modular Connection Units

Industrial image processing

- Light Section Sensors
- Smart Camera

Accessories
