

MULTIGRIPFJ

Gripper

MultiGrip Robot Grippers were designed with a single purpose in mind: to make a better gripper for high-mix CNC machine tending. Robots equipped with MultiGrip require less change-over-time, are easier to program, work with more part geometries and are more capable than any other robot gripper for CNC machine tending

PRODUCT FEATURES

Fixed Jaw Gripper allows for smooth loading of a fixed jaw vise

Light weight (3.75lbs = 1.7kg) to maximize part payload

Gripper engineered specifically for CNC machine tending

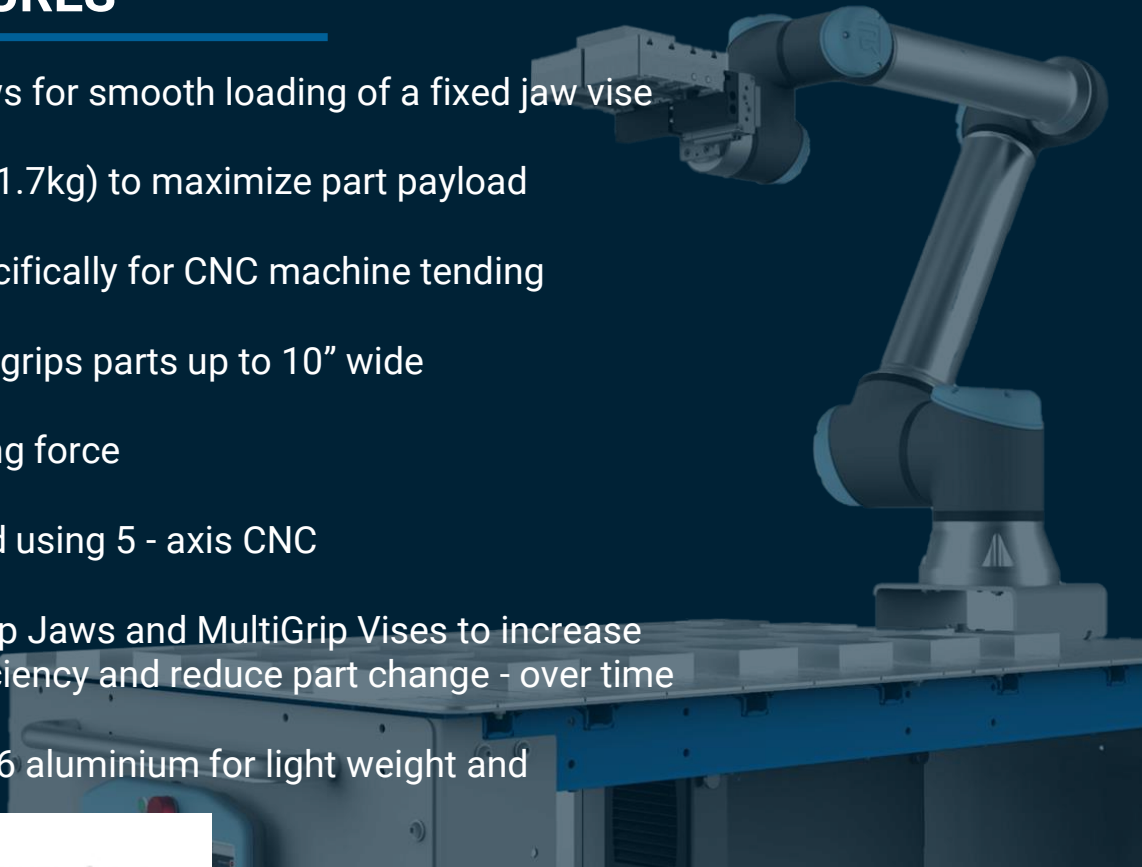

Widest gripping range - grips parts up to 10" wide

Up to 200lbs of clamping force

Precision manufactured using 5 - axis CNC

Combined with MultiGrip Jaws and MultiGrip Vises to increase milling automation efficiency and reduce part change - over time

Hard anodized 6061 - T6 aluminium for light weight and durability
